INDEX

IEE Review Volume 48
January-November 2002

Subject index

Communications

The convergent phone, by R Dettmer January, p23
Networking gets personal, by M Bravo-Escos January, p32
Soil searching, by R Lee January, p37
Cardiff chosen for market trial of pioneering mesh network January, p2
Alcatel researchers demonstrate world record optical transmission January, p2
UK to have nationwide network of Internet payphones January, p4
Structured cabling comes of age, by C Frazer March, p33
GSM over Ethernet, by R Dettmer March, p37
Bandwidth galore?, by A Muir May, p37
UK to get public wireless LAN May, p4
Satellite images protect North Atlantic shipping May, p6
Thales helps the Tube to keep track of its trains May, p7
Online journal for space watchers July, p9
Disaster watch, by M Williamson July, p19
The softswitch advantage, by S Williams July, p25
One number could fit all with ENUM protocol July, p6
Remote asset monitoring without phones November, p2
Volvo takes the HiPath to high-tech telephony November, p4

Computing and control

Marconi builds on success in China November, p2
Power to play, by M Froggatt March, p13
Raychem data bus chosen for Saab fighters March, p7
Schneider's one-stop shop March, p7
Unlocking the power of the Grid, by R Dettmer May, p9
'I know Wendy - she's OK', by R Dettmer May, p26
Web-based DVD remote is a first July, p2
Outlook bright for new Met Office computer July, p9
Train protection, by D Fenner September, p29
Pattern matching for pleasure and profit, by R Dettmer November, p16

Electronics

Compound interest, by C Snowden January, p15
Semiconductor sales slump may be nearing end March, p4
Going for gold, by R Holliday and P Goodman May, p15
Intel announces world-leading chip manufacture capabilities September, p4
Midlands college opens electronic test facility September, p6
Can the semiconductor industry weather the perfect storm? November, p6
Where next for the microprocessor? November, p7
Xerox creates self-assembling 3D structures November, p10

Energy and the environment

Assimilating wind, by D Milborrow January, p9
Lewis leads Caledonian drive on renewables January, p6
'Stay loose' message of Energy Review March, p2
Offshore generation looks set to take off, by L Sharpe May, p24
Changes planned in Scottish electricity market May, p2
New energy boost for North East May, p4
Stop dithering on radioactive waste, says Academy May, p6
Living with NETA, by R Dettmer July, p32
Efficiency 'potentially more important than renewables' July, p2
Government 'needs to spend more to promote solar power' July, p4
Renewables get Earthed July, p4
ESI businesses have room to improve, says Minister July, p10
Wave energy gets seaworthy, by R Dettmer September, p14
Just a WEEE problem..., by J Churchman-Davis November, p38
Is Europe ready to go lead free?, by D Lenton November, p41
Electricity's hidden costs, by P Watkiss November, p27
'No business case' for investment in energy efficiency technology November, p8
Ford proposes wind-powered engine plant November, p10

Management and education

A site for sore eyes?, by P Clapham March, p8
Nothing venture..., by D Cheesman March, p21
Making the grade, by D Lenton March, p26
Ambassadors scheme sends engineers back to school March, p4
Utilities missing out as millions move home July, p10
Aerospace firms form air traffic partnership September, p6
Keeping an eye on the world Sepember, p8
The challenge of collaborative commerce, by A Morris November, p33

New technology

National jigsaw puzzle has 400 million pieces January, p6
Galileo project endangered January, p6
University designs artifical body March, p4
Fuel cells move closer to production May, p2
Italy's smart meter project gathers speed May, p2
National map gets more detail July, p10
Lighting the way to a low-energy future, by G Routledge September, p21
Polymer display pioneers scoop engineering award September, p2
Cellphone radar partners sign development deal September, p2
Smart homes offer business opportunities September, p4
Monitoring air quality with lidars September, p6
A helping hand for inventors September, p8
Storm information in a flash September, p9
Building industry tags materials September, p9

Politics, social impact and history

The radical who shaped the future, by D Robertson May, p31
Television's liberator, by M Frankland July, p11
Work permit scheme 'being abused to get IT staff into UK' July, p4
Wanted: role models to make a NOISE about engineering July, p8
A broad place, by D Lenton September, p11
Back on track, by D Dowle September, p34
Sustainable growth for Europe's railways September, p37
SARTOR is dead, long live SARTOR!, by M Sterling November, p13
Copycat components could kill, warns GAMBICA November, p8

Power

Polish power project puts paid to pollution January, p2
ABB to lead Java power line project January, p4
Power protection for Airbus UK March, p2
APC launches 'pay as you grow' power infrastructure March, p2
Indian hydro stations uprated May, p4
ABB to build east-west electricity grid link in USA May, p6
AEA Technology wins £47m MoD contract May, p7
Pay as you grow protected power, by L Sharpe July, p37
Choloride goes underground September, p4
Manitoba Hydro chooses Alstom September, p4
Eurotunnel orders locomotive power upgrade November, p4

Author index

Bravo-Escos, M: Networking gets personal January, p32
Cheesman, D: Nothing venture... March, p21
Churchman-Davis, J: Just a WEEE problem... November, p38
Clapham, P: A site for sore eyes? March, p8
Dettmer, R: The convergent phone January, p23
Dettmer, R: GSM over Ethernet March, p37
Dettmer, R: Unlocking the power of the grid May, p9
Dettmer, R: 'I know Wendy - she's OK' May, p26
Dettmer, R: Living with NETA July, p32
Dettmer, R: Wave energy gets seaworthy September, p14
Dettmer, R:Pattern matching for pleasure and profit November, p16
Dowle, D: Back on track September, p34
Fenner, D: Train protection September, p29
Frankland, M: Television's liberator July, p11
Frazer, C: Structured cabling comes of age March, p33
Froggatt, M: Power to play March, p13
Goodman, P and Holliday, R: Going for gold May, p15
Hill, J: Sustainable growth for Europe's railways September, p37
Holliday, R and Goodman, P: Going for gold May, p15
Lee, R: Soil searching January, p37
Lenton, D: Making the grade March, p26
Lenton, D: A broad place September, p11
Lenton, D: Is Europe ready to go lead free? November, p41
Milborrow, D: Assimilating wind January, p9
Morris, A: The challenge of collaborative commerce November, p33
Muir, A: Bandwidth galore? May, p37
Robertson, D: The radical who shaped the future May, p31
Routledge, G: Lighting the way to a low-energy future September, p21
Sharpe, L: Offshore generation looks set to take off May, p24
Sharpe, L: Pay as you grow protected power July, p37
Snowden, C: Compound interest January, p15
Sterling, M: SARTOR is dead, long live SARTOR! November, p13
Watkiss, P: Electricity's hidden costs November, p27
Williams, S: The softswitch advantage July, p25
Williamson, M: Disaster watch July, p19

Book reviews

Clapton, A (Ed): Future Mobile Networks May, p14
Doheny-Farina, S: The Grid and the Village January, p30
Frankland, M: Radio Man November, p22
Hamilton, J.: Faraday: The Life November, p22
Manwell, J F et al: Wind Energy Explained September, p42
Price, A: The History of US Electronic Warfare January, p30
Smith, J: Troubled IT Projects September, p42
Westbrook, M: The Electric Car May, p14
